28	Note:																
29	1. ABO/RhD typing by molecular methods is used only for the purpose of presumptively listing the predicted ABO/RhD phenotyping.																
30	2. The Registry listing of ABO/RhD may only be used as predictive value and may not be used as one of two required tests performed by an FDA or CMS approved method. Our Laboratory policy state that ABO/RhD typing by molecular methods is not used for clinical purposes.
